

Wood-fired Cook-stove Ranges

Domino & Domina

Domestic Pleasure and Kitchen Treasure

Designed and produced in Italy by the de Manincor family (5 generations), the Domino 8 & 6 Maxi, Domina, Atmosfera, and Eco wood burning cooking ranges are contemporary stoves that mix old world style with state-of-the-art workmanship. These wood-fired oven ranges offer beauty and functionality in one neat package. The ancient art of cooking on a wood burning fire adds a unique smoky flavor that cannot be reproduced in a conventional oven, and as every chef knows it is the best way to draw out the best flavors in a recipe. These products are perfect for kitchens or areas that call for the addition of innovative cooking appliances.

Features

The fire door is fitted with a panoramic window so all the flames are visible, and the air-wash system keeps the glass clean. The large firebox produces high output with low maintenance and is equipped with an ash pan. Also included are a thermometer, a humidity regulating system, and a large baking rack. The vented sides on top boost natural convection.

Eco-friendly Heat Producer

The de Manincor combustion system is highly efficient and utilizes the ECOPLUS® system, which improves combustion by way of pre-heated secondary airflow that passes over the flame and burns off any remaining gas. This process reduces CO (carbon monoxide) levels to a minimum, and the second flame operates at maximum efficiency. These stoves boast cleaner smoke and lower levels of air pollution with a 70-75%+ efficiency, that contributes to reduced wood consumption.

Domino 8 Maxi & Domino 6 Maxi

The stylish Domino is every homeowners dream and is available in two sizes, 8 Maxi & 6 Maxi. The Domino 8 Maxi (on the front cover and at right) measures 31" wide and is a standard size cook stove. The Domino 6 Maxi (shown at right) measures 24" wide and is a good size for kitchens that have smaller space requirements.

Domina

The whimsical Domina (shown at right) is a freestanding stove with distinct legs and designer appeal. It measures 24" wide, and can be used in a casual living room setting as a heat source with a cooking option or worked into a kitchen scenario as a cook stove.

Atmosfera

Atmosfera

The elegant Atmosfera (shown at left) is the “bell of the ball”, and it measures 35” wide. This full service stove has a cook top, a full size oven, and a sizeable wood storage compartment at the base.

Eco 90 & 80

The moderate Eco is ideal for those that want a stove that combines minimal style with high standards, and it is available in two sizes—Eco 90 & Eco 80. The Eco 90 measures the same as the Atmosfera, and the Eco 80 is the same size as the Domino 8 Maxi.

Quality and Materials

All of the de Manincor products are manufactured with top quality, heavy duty stainless steel. The cast iron hotplates on the top provide long-lasting and maximum conduction, even with high temperatures. The fireboxes are entirely covered with refractory tile bricks to boost performance and maintain high temperatures as well as optimize cleaner combustion and evenly store and distribute heat.

Options

The flexible flue venting options include rear, left or right side opening. The stainless steel base has adjustable height and depth to adapt to built-in configurations. There are optional stove rails on the front and sides (examples on the front cover, on the opposite page on the Domina, and on the Eco 90 at left).

Doors

The doors for all the models of the cook stoves come in either black or stainless steel as shown at left on the Eco 90 in black and the Eco 80 in stainless steel.

Colors

All the models are available in Red, Blue, Black, White, Ivory, and Stainless Steel. The Atmosfera also comes in Green, and the Domino’s, Domina, and Eco’s also are available in Yellow, see samples below.

These cook stove ranges offer innovative design, high performance and rapid heating, are environmentally friendly, and have a contemporary edge. Using wood is a renewable resource. Enjoy and bon appétit!
