SO... LO... and yet SO...HI...

The Twinfire® SOLO is the latest addition to an already spectacular collection of highly efficient stoves. At 93% this super environmentally friendly wood burning stove has great heat output and low fuel consumption with much less ash. The sleek, all black steel stove body combined with the patented double chambered burn system puts this stove in a category of its own.

Made in Germany by xeoos, the Twinfire® SOLO is the basic black version in this collection. The SOLO measures 44"(113cm) high x 18"(47cm) wide x 16"(40cm) deep and heats 41kBTUs (over 1,000 ft²). Its minimalism and simple beauty stands out, and its ultra contemporary look and extreme style is an attractive asset that is perfect for homes that seek super modern flair in a wood burning stove. An added bonus is the economically friendly price tag. This new stove promises to please in all areas.

The other Twinfire® models include: the BASIC, CLASSIC, ELEGANCE, and PUR. All models utilize the unique double chambered combustion system for effective, environmentally friendly wood burning capacity and are EPA certified and approved to UL/ULC standards. Outstanding design features include: a construction of high quality materials, a thermally decoupled silicone door handle, a uniquely shaped grate and an optional lower steel gate to catch any remaining ash. Check out our unique and enjoyable video on the Twinfire® on our website www.wittus.com.
