Phenix Green 120

Open the Door in Your Home With...

Double Door Technology

Two fireplaces in one, the Phenix Green built-in zero clearance wood burning collection from Bodart & Gonay of Belgium offers twice as much enjoyment with the innovative open and closed door option. With the door closed, enjoy optimal heat output and a complete view of the fire; with the door lifted and open, enjoy the warmth and smell of a crackling fire. This clever new technology provides double satisfaction and fire viewing pleasure within the comfort of your home.

A newly designed burn system makes the Phenix the most efficient stove of its kind. All styles include special features such as the multi-ducting capability, which allows for heat transfer in up to six additional rooms; a linear, seamless steel glass door frame; and an upward lifting/forward tilting door feature that makes it easy to clean the glass viewing window. The built-in outside air system uses 100% direct air intake and the automatic thermostat keeps the temperature steady. This distinct fireplace is available in four models: Phenix Green 75 measures 24"W x 19"H, Phenix Green 85 measures 28"W x 24"H, Phenix Green 95 measures 32"W x 19"H, and the Phenix Green 120 measures 42"W x 19"H. The Phenix Green series offers a solution for every design challenge.

The Phenix Green fireplace stands up to its name with a standard of perfection unmatched by any other. Benefits include high efficiency rates of 77%-82% and low emissions. The Phenix Green wood burning fireplace is eloquent and distinguished and is a new addition that will warm your heart, your body, and your home.
