Mind your Fire in Style...

Accessorize!

Tending a fire is just as important as making one, and nothing beats well designed tools and accessories like the ones offered in the new Wittus collection. Italian designers, Studio Barazzuol Malisan and Ferrari have collaborated to produce an impressive accessories assortment. APROS from Italy offers a selection of new age industrial pellet holders, Red Anvil from the German Alps, contributes a wide variety of appealing tool sets and wood holders, and Harrie Leenders of the Netherlands is an expert on well designed wood stackers and a very clever fire poker.

Handpicked to accent contemporary stoves and fireplaces, these accessories are a mix of vogue colors, the highest quality steel, aluminum, wood and cutting edge design. Steel bins made exclusively for pellets integrate industrial materials and color to add style to storing pellets. Balanced floor standing tool sets in various shapes and tool heights range from 17"-22"H or wall hung tool sets, are a match for modern hearths and stoves. Leather tool handles mixed with stainless steel bodies and ash brushes with wood heads create a collection of utensils too pretty to dismiss and are especially made to handle the heat.

This varied collection of tools and fireplace accessories allow you to choose from an array of colorful products from around the globe. Place a well designed tool set, wood holder or pellet basket by the fireside and look forward to tending your fire in style.
