Zero Clearance Gas Fireplaces and Inserts ...

Linear Flames with Style

The P, PL, and R Series direct-vent gas fireplaces from Montigo of Canada, offer technology and great design in one neat package. These zero-clearance landscape-style units have a concealed ribbon flame burner and a clean lined frame that graces any room with elegance and style. The I Series are beautifully designed fireplace inserts with lots of options.

The P & PL Series are available in three sizes: 38, 42 and the largest 52" wide. Both have the option of a fireplace surround in black or stainless steel and comes with firestones in white, silver, and opaque or the option of stone or glass media in various colors. Also, speckled stones can be combined with a driftwood log set for the perfect combination of nature. The PL models are basic, while the fully loaded P Series comes with accent lighting, a multi speed fan, and a black porcelain firebox liner that reflects the ribbon flame onto the back of the box "doubling the fire" when burning.

Single sided or see-thru, the R Series gas Fireplace offers modern design and refined elegance. Available in 4 sizes: R320, R420, R520 and RP620. Custom models include the 7' R720, the 8' R820, and the R324-ST indoor-outdoor model. Special features include frameless design, a large fire viewing window and an easy access glass door. All models come with firestones and the option of fireglass, speckled stones, and/or a driftwood log set.

The perfect gas insert for every fireplace, the I Series comes in two sizes: the 30FID and the 34FID, and two styles: the linear model and the traditional (with log set). Each style has its own appeal and both models include a satin black surround, co-linear direct venting, hidden pilot design, and tool free access to the control system and much more.

These fireplaces enable you to enjoy the warmth and drama of a truly contemporary hearth just about anywhere you choose. Frame them in the wall for a serene minimal look, make a commanding hearth of marble or stone, or install an insert into an existing open fireplace and convert it into a more effective heat source.
