When you use a wood-burning source of heat, you gain much more than a lower heating bill and a mesmerizing flame to curl up in front of on a cold night." ~Premier Firewood Company

Summer Fire Safety

Enjoy the Summer safely. When it comes to the element of fire, it can't hurt to be too cautious. Fire safety is an important aspect of owning a wood burning fireplace. Make sure you have a fire extinguisher in close proximity to your stove, a water source, and a clear view of the exit. These safety precautions will pay off in the event of an emergency.
