March /April 2025

### Wittus Lunch Essentials

It was our pleasure to host some of our favorite essential workers to lunch at Wittus. We are so thankful for their commitment to their jobs. Joe (back) our postal afficionado has since retired from his post after 10 plus year at the Pound Ridge Post

Office. Jack (middle), our UPS guy is a reliable friend and an added bonus is his daughter Kayla (front) who also joined us. A big thank you to all.

### It's Time for Outdoor Grilling

When the weather gets nice the chefs get going outside. Getting your grill ready for the season is the first thing you can do. Make sure to clean the grill rack with a

wire brush and remove any lingering debris. Then set up your wood supply so that its at the ready. Clean your grilling tools and put them in place. Ready,

set, go, start grilling! *Phenix and firebird grills shown above left, Shaker outdoor grill and Niels Wittus above.*

### How to Clean Stove Glass - 101

Owning a wood burning stove is a good investment that will keep on giving. It is important to clean the glass periodically to keep it free of creosote build-up; here's how!

1. Use a moist paper towel and dip it into some of the fine ash inside your firebox.
2. Rub the glass with the paper towel in a circular motion until the entire surface is covered.
3. To remove the ash-paste, reverse the process using a clean moist paper towel.
4. For tough stains make a thick paste from the ash and leave it on for 10-15 minutes, then remove.

### Stove News

"One Stop Shopping with Style "

*"When the cold air seeps into the house and the long, cloudy days turn into long, chilly nights, it's only natural to yearn for a beautiful fireplace filled with dancing flames to cuddle up next to. It's in our human DNA, after all. But if your fireplace is outdated and unused, or you find yourself wistfully staring at the space where a new one would fit perfectly, it's time to embrace your favorite modern fireplace ideas and check out some fireplace trends."*

~ PODS

### NEW! Spartherm 800 Series

The Spartherm 800 is a force to be reconed with. A beautiful fireplace that comes in different models including a Masonry Insert, a Zero Clearance Fireplace and the Modular freestanding stove. The stoves are tested to EPA

standards with a single setting burn rate. They take up to a 21" log size and have a nice size viewing window. Go to our website [www.wittus.com](http://www.wittus.com) for more information.

### Cookin Stack

A cooking classic, the Cookin' Stack from La Castellamonte, Italy. A fashionable stove with a sturdy wood base that heats the home, with a nice size firebox and a cast iron cook top. Tile side cladding is available in select colors. See our brochure for more choices. *Cookin' Stack shown in Crema, gloss finish with wood base.*

### Gelfire Pillars

shine all day long!

The Star and MiniStar pillars offer outdoor ambiance lighting at its best. Made of heavy gauge cor-ten steel and topped with stainless steel fuel wells that conceal the gel can, these pillars will light up every outdoor space. Each can burns for 2 to 3 hours. The fuel is odorless. Star 5' tall, MiniStar 3 ½' tall. Let the stars
