A Classic Contemporary...

The Shaker is a unique wood burning stove that is EPA certified to 2020 standards and appears on the list of EPA approved stoves. With an efficiency rating of 76%, the Shaker stove qualifies for the Federal tax credit. It has immense contemporary appeal that combines tradition and charm, and is a product that can adapt to various design scenarios. The brainchild of renowned Italian architect and product designer Antonio Citterio with Toan Nguyen, the Shaker stove's design is based on classic American Shaker furniture. Originally inspired by his wife's love of this distinct style, combined with the need to heat their home, Antonio designed the Shaker especially for this purpose.

The small but highly efficient firebox measures 14" high, 16" wide and 12" deep. The stove body measures 36" high x 23" wide (at the bottom) and 14" wide (at the top) x 16" deep. The long bench measures 6 feet long. Made of steel and weighing between 300-330 lbs. depending on the model, this stove is a highly efficient heating machine. Both models include the option of a right or left side opening door.

The Shaker is a stove with history and honor, and is now available exclusively through Wittus. The proud recipient of the prestigious reddot design award and the Chicago Museum of Architecture Good Design award in 2006. This special stove is waiting to become a part of your home.
